ABOUT THE SEMINAR

Radiopharmaceuticals are unique medicinal formulations containing radioisotopes which are used in major clinical areas for diagnosis and/or therapy.

Recently the pharmaceutical industries have keen interest in developing novel radiopharmaceuticals for diagnosis and therapy. After realizing the tremendous impact of radiopharmaceuticals and to provide the right platform to unveil the novel frontiers in radiopharmaceutical this seminar is planned. It is a competitive subject in the global scenario, to provide proper direction and to channelize regulatory and clinical aspects of radiopharmaceuticals. The seminar will increase the awareness toward regulatory aspects and clinical application of radiopharmaceutical amongst all participants.

OBJECTIVES

The national seminar has been focuses to enhance knowledge dissemination amongst varied range of participants including eminent speakers, renowned scientist, Industrialist, young researchers and students. The seminar is planned with the aim to update the knowledge regarding radiopharmaceutical preparation, radionuclide

generator, kits for radiopharmaceutical preparation, radiopharmaceutical precursors and review on the procedures for diagnostic and therapeutic use of radiopharmaceuticals.

TOPICS TO BE DISCUSSED

In seminar, discussion will be made on regulatory aspects and clinical application of radiopharmaceuticals which will include

- ✓ The awareness toward quality control of radiopharmaceuticals amongst all participants.
- ✓ The recent advancements in the field of clinical application of radiopharmaceuticals.
- ✓ The packaging details of unit and multiple dosage preparation and “Cold Sterilization”.
